Channel Performance at Once

Channel	Revenue	Avg Discount %	Margin %	Return Rate %	Avg Delivery Day
Marketplace	3.76M	19.65	43.15%	12%	9
Website	7.14M	4.48	52.12%	7%	4
Mobile App	10.68M	4.40	52.16%	7%	3

Business Question : The founder can fix exactly one thing this quarter. What's the recommendation, the money at stake, and the number to track?

Marketplace is the only channel that underperforms on all four metrics at once — 4.4x heavier discounting (19.71% vs ~4.5%), 9 points lower margin (43.14% vs 52%+), 1.7x higher return rate (11.83% vs ~7%), and more than double the delivery time (8.54 vs ~3.5–4 days). This points to a structural fulfillment problem, not a one issue.

Renegotiate Marketplace fulfillment terms this quarter — reduce discount dependency and tighten delivery SLAs with third-party sellers. Bringing Marketplace margin to the App/Website average (~52%) recovers **₹3.37L in additional gross profit** from existing revenue alone.

Marketplace Margin % — currently 43.14%, should climb toward 50–52% if the fix works.
