Business Questions

Q1. Does a higher budget lead to greater box office revenue?

Higher-budget movies generally tend to generate higher revenue, showing a positive relationship between budget and box office revenue. However, budget alone does not guarantee commercial success.

Q2. Which movie genres generate the highest revenue?

Sci-Fi generates the highest revenue, followed by Fantasy and Adventure, making them the strongest revenue-generating genres in the analysis.

Q3. Is there a relationship between audience ratings and commercial success?

Higher audience scores generally show better revenue and ROI, while IMDb ratings also show a positive association with ROI. However, the wide spread of points indicates that ratings alone do not determine commercial success.

Q4. Which directors or actors consistently deliver successful movies?

Patty Jenkins stands out among directors for strong overall commercial performance. Among actors, Emma Stone, Ryan Gosling and Timothee Chalamet show strong performance across revenue, profit and ROI. Their strong results across multiple metrics indicate consistent contribution to movie success.

Revenue Consistency Table					
Director	Total Movies	SD	Avg Capped Revenue M	Average Revenue M	Total Revenue M
Sofia Coppola	10037	107.62	106.48	131.82	1.32M
